## PROFILE

PROFILE

SUMMARY

I am an Android developer with over 2 years of experience in the industry. My skills include developing applications in Kotlin and Java, using Android Studio, Android SDK, and Android Jetpack. I also have experience working with various libraries and frameworks such as Retrofit, Dagger, RxJava, and Room. I am able to develop quality code using best practices and object-oriented programming principles. I am also a team player and able to communicate effectively with colleagues at different levels. I am a fast learner and strive to continuously develop my skills to stay up-to-date with the latest trends and technologies. Overall, I am a responsible, results-driven, and collaborative Android developer who strives to achieve success in
